[linkedin.com/in/matt-fay](https://linkedin.com/in/matt-fay)

Primarily a *self-taught* software developer with a broad spectrum of skills extending beyond writing code. My expertise encompasses web application development, technical writing, and growth marketing. While my core proficiency lies in **full-stack JavaScript**, I have experience (or at least explored) with multiple technology stacks such as **PHP, Ruby, and C#/.NET**.

Beyond professional pursuits, I have several hobbies: I enjoy playing chess (1. e4), practicing Jiu-Jitsu, and reading extensively, with a particular interest in philosophical texts.

## EDUCATION

### freeCodeCamp

2015 - 2016

#### Front-End & Backend Web Development

- HTML/CSS, Bootstrap, JavaScript, NodeJS, ReactJS, jQuery, OOP and Functional Programming, JSON APIs and Ajax

## CERTIFICATIONS

- [CompTIA Network + Understanding Networks](#) (2019)
- [Ethical Hacking with JavaScript](#) (2019)
- [Stanford Online Computer Science 101](#) (2015)

## EXPERTISE

## PUBLICATIONS

### Fundamentals of JavaScript (2018)

- Lessons were published on Highbrow after thorough review by their editorial team

## PROJECTS

## PROFESSIONAL EXPERIENCE

### JavaScript Today

Founder · Content Creator · Developer | Jan 2022 - Present

- Within a year, "**JavaScript Today**" achieved the top position on Google as a testament to dedicated efforts. I oversaw the development of the entire platform, including the newsletter and blog, with several upcoming projects set for launch.

### Hamlin & Associates Inc.

Front-end Developer | May 2023 - Present

- Initially hired as a front-end developer, I quickly became proficient in **C#/.NET, TSQL, and mobile development using React Native**. My daily responsibilities included bug fixes, feature development, and other related tasks.

### CompTIA

Subject Matter Expert | Oct 2023 - Dec 2023

- Hired as a contractor to author a new full-stack web development program. My responsibilities included writing course curriculum, lesson plans, and scripts for video lectures.

### KodeDen

Software Developer · Instructor | Jan 2023 - Aug 2023

- Developed course curriculum, assisted students with technical issues, and implemented unit tests featuring algorithmic challenges.

### United Water Restoration Group

Software Developer | Jan 2022 - Mar 2022

- Hired to update and enhance an outdated web application utilizing **Vue, Node, and MongoDB**.

### Gentex Corporation

Software Developer | Jan 2019 - Mar 2022

- Developed a web application to assist the production team's inventory tracking.

### JavaScript Today

- A newsletter/blog with **10,000 monthly readers** and 4,400 followers on Facebook

### Agōgē Week

- A blog inspired by Stoic philosophy

### Flagler Chess

- A Bulma-built website promoting chess games in Flagler County

### Jitsu Journal

- A journal app for Jiu-Jitsu practitioners built with VueJS, NodeJS, and React Native for mobile (demo)
